- Download the dataset.
- Preprocess or clean the data.

Data cleaning is the process of adding missing data and correcting, repairing, or removing incorrect or irrelevant data from a data set

- Analyze the pre-processed data.

Data preprocessing can refer to manipulation or dropping of data before it is used in order to ensure or enhance performance, and is an important step in ...

- machine learning algorithm.

Machine learning (ML) is the scientific study of algorithms and statistical models that computer systems use to perform a specific task without being explicitly programmed.

- Save the model and its dependencies.
